

The error log

The most valuable page in this book for problem-based subjects.

Date	Problem	What I did	Error category	Fix

Error categories

- Conceptual — wrong principle.
- Procedural — right method, wrong execution.
- Arithmetic — slip.
- Comprehension — misread the question.
- Time — ran out.

After twenty entries, count the categories. The largest one is what to work on. Without the count, every mistake feels like a one-off.
